STANDARD CLOTHING CO. THIESEN BUILDING C. C. Goodman, Geo. Arnsperger

R. K. WHITE, Watchmaker, Manufacturing Jeweler and Graduate Optician, 218 Palafox Street, Pensacola, Fla.

TERSELY TOLD.

Major A. Slaker, of Fort Morgan, was in the city yesterday on a short visit to the local fortifications.

S. D. Ingraham left last night for Cuba, where he will spend some time on a visit to friends.

The Journal has a number of wanted answers for "Q." "J. S." "444." "A. S. R." "Cow." "X. Y. Z." "Pri-

vate." "H. B. T." "Johnson." "Farm." "J." "Lots." "C. D." Owners will please call for them.

The steamer Jennie A. Hall arrived in port late yesterday afternoon, and went up to the quarantine station.

The Terminal Company will run a late train to-night, and as these events are always enjoyable, it is expected that a large crowd will be present.

Wyer's Band will give a free concert in Seville square to-night, and as these events are always enjoyable, it is expected that a large crowd will be present.

J. A. Larcom, who left here a week ago for a visit at Cadillac, Mich., has written to friends that the climate there is such that an overcoat is comfortable during the evening. He will be absent about a month.

Southern Hotel Arrivals: P. R. Sikes, Cavilla, Fla.; Allen W. Brewton, McDavid; J. W. Brewton, McDavid; C. T. Snowden, W. R. Taylor, Florida; J. M. Jones, Detroit, O.; S. Elmore, City; H. G. Brown, Louisville; S. T. Boyd, Valdosta; J. B. Madison, Florida.

The Jasperson sisters, who have been assisting Captain and Mrs. Norris, of the Salvation Army, for the past week, are drawing large crowds to the Army tent on Seville square, where meetings are held nightly. Fully two hundred people attended the services last night.

C. C. Nicholson, who has been in failing health for some time, left yesterday morning for Denmark, where he will visit relatives for several months. He goes by way of Jacksonville, where he will board a Clyde line steamer for New York, taking a steamer there for Denmark.

DeFunak Breeze: Mr. and Mrs. Mural Curtis and little daughter, of Pensacola, Miss Rebecca Craig of Selma, Alabama, and Miss Mary Lou Christholm of Dallas, Alabama, spent Thursday here with their aunt, Mrs. Sue Gillis. Miss Craig will remain here several days.

Fourteen defendants were before Recorder Laney in the municipal court yesterday morning for trial. Of this number sentence was suspended in two cases, one case continued, two defendants given twenty-four hours in which to leave the city, and two given jail sentences of thirty days each. Fines imposed amounted to \$132.

Persons who were not aware of what was transpiring, became somewhat excited yesterday afternoon, when they saw the men employed on the Tarragona street wharf rolling out hose, as if preparing to fight a fire. It proved to be only a fire drill, how-

DR. PORTER TO THE PEOPLE OF FLORIDA

Timely Advice Given in Address By State Health Officer.

Dr. Joseph Y. Porter, State Health Officer, has given out the following address to the people of Florida:

Address to the Public.

To Property-owners, Householders and All Citizens of Florida: The summer months embrace a period of the year when through atmospheric changes and elevated temperature, fermentation and putrefaction occurs rapidly, and is likely to produce sickness of many kinds. It should, therefore, be the care of all householders to keep their premises clean and clear of any fermentative trash and filth.

Housewives should pay careful attention to the sanitation of both the inside as well as the outside of their homes. Cleanly premises are as essential to health as personal hygiene measures. Ventilation and sunlight are nature's healthful aids, and currents of fresh air with sunlight reduce the transmission of infection. Daily or bi-daily bathing of the body not only conduces to comfort, but removes effete particles from the skin, which are cast off from the body through the medium of perspiration, and which should not be allowed to accumulate and saturate under-clothing. This latter should also be frequently changed if good health is desired, especially by those persons who exercise violently or work and who perspire freely.

Clean and Keep Clean. Housewives should not content themselves with dusting and with clean floors. Water closets should be looked after and kept well disinfected. Clothes closets should be aired and

ever, which occurs occasionally, in order that the employees may keep in practice. All of the hose and pipes were tested during the drill to see that they were in good condition.

Blue Ribbon Lemon and Vanilla Extracts will give your desserts the famous "Blue Ribbon Flavor" which is different from all other flavors. Ask your grocer for Blue Ribbon Lemon and Vanilla. Takes less. Flavors perfectly.

kept free from trash and articles which may harbor insect life.

The family refrigerator should be particularly looked after. To keep this article of butter-pantry perfectly clean and sweet should be the first care of all good housewives and housekeepers, for it can easily become foul and a menace to both the older as well as the younger members of a family through ptomaine absorption and poisoning. Mothers, especially, should give the refrigerator the greatest attention, and should prohibit the keeping of fish, fruit, vegetables, meat and milk in the same compartment. Milk easily absorbs odors and taint from eatables which may be in the same space and should, therefore, be kept to itself in tightly closed rubber-gasket-bottles or vessels and on the ice. Unless cows' milk is certified to be pure by city inspection of laboratory examination, or is produced on a farm under the immediate supervision of the owner, it is safer to the health of the child as far as infant feeding is concerned, not to use cow's milk at all. Condensed milk, which must be sterilized to acquire its preparation for canning, is a far safer article for food to bottled babies, and as condensed milk is eradicated in fats and sugar, it is very easy to find out which particular brand will agree with the baby.

Care in Eating. Fruits, when naturally ripe and sound, are healthful in summer. There are but few fruits which disagree with the digestive function of the adult human or child when ripe; occasionally idiosyncrasies are met with, and in such cases, persons will do well to shun those articles whether of fruit, fish, meat or vegetables, which tax the digestive organs beyond their natural capacity to healthfully assimilate. Do not overeat. Nature provides succulent plants and fruits in summer, because there is not that need or demand for stronger diet as there is in the colder season of the year, when heat-producing functions of the body must be stimulated. Fruits and vegetables will assist nature in keeping the bowel function in good working order and in healthful condition, thus sparing the individual from resorting to frequent purgation, and many potent nostrums, which always leave the system in a worse condition than before taking.

Mosquitoes Carry Disease. It is no longer a theory or a "fad" of some "crank" doctors that certain mosquitoes carry disease by acting as intermediary hosts to the human being. Mosquitoes of the genus Anopheles (which means vagrant or worthless) do convey, when infected, the malarial parasite to the human. This has been proven beyond any shadow of doubt, as has also the fact that the Stegomyia genus of the mosquito conveys, when infected, the germ—perhaps parasite—of yellow fever; in the same manner dengue is thought to be conveyed by the genus Fatigans, and it has not, as yet, been determined how many more of these same kinds and description of fevers may not, although now unknown, be conveyed to the human through the mosquito acting as a means of transmission.

These scientific facts should not be postponed or ignored by the people. They are not only worthy of thought, but of deliberate and careful heeding. A single female mosquito will lay a sufficient number of eggs in a water pitcher in an unused bed-room to not only fill the house with her offspring, but supply the neighbors within the radius of the square.

Eradicate Breeding Places. So, too, will old cans lying about the yards, or saucers of ornamental pot plants, and receptacles which oftentimes a careless housewife sets the table legs in to escape the sugar or other sweets of ravages by ants, supply a breeding place for millions of mosquitoes.

Standing water of any kind, whether fresh or brackish, will afford the female mosquito an opportunity to propagate her species, for she must have water to lay her eggs in or upon. No water no mosquitoes, may therefore be accepted as an axiom.

If, therefore, each citizen of Florida will constitute himself or herself a mosquito destroyer, by looking after little details of mosquito propagation, the mosquito pest will be considerably lessened in the state, and particularly in that portion of the state where artesian wells are plentiful and rain water is not required for potable purposes.

Where brick cisterns or wooden tanks are required to store rain water, the female mosquito can be prevented from depositing her eggs therein by screening the cistern or tank with wire gauze mesh, 16 to 18 inch, and by using kerosene oil in small quantities on the surface of the water, say about a teaspoonful to about 15 feet of water surface.

The wire screening will prevent depositing of eggs, and kerosene oil will prevent the hatching out of any which may have gotten into the tank, as the "wigglers" cannot get to the surface to breathe and consequently will die. Attention to mosquito prevention and destruction will lessen and in time ef-

BURTON GUILTY ON TWO CHARGES

Convicted in the Criminal Court Last Night of Forgery and Uttering Forged Paper.

B. H. Burton, former deputy clerk of the circuit court, was convicted last night of forgery and uttering forged paper. The jury returned the verdict shortly before 10 o'clock, after considering the case for nearly four hours. A motion for a new trial was made.

When the case, which was commenced Tuesday, was resumed yesterday morning, the prosecution continued the prosecution of their case, and the noon hour was reached before all of the state witnesses had been examined.

The defense then presented its side of the case, after which the arguments were heard. Mr. Burton, contrary to expectations, did not go on the stand in his own behalf, but during the entire day remained seated near his attorney.

factually rid a community of malarial reputation. So, too, will a hindering of mosquitoes prevent yellow fever from spreading, where the particular species of mosquitoes which convey yellow fever exist and are abundant. No one should sleep, and particularly at night where mosquitoes exist, never mind of what species, without net, and care should be taken to see that no mosquitoes have gotten into the net after it has been lowered about the bed.

The malarial mosquito and the yellow fever mosquito do the work of infection after 5 o'clock in the afternoon, and before daylight the next morning; in other words, during the hours of darkness and semi-darkness. If this fact is remembered and a little care taken, never mind what the altitudinal conditions may be or what the miasma, an escape can be had from yellow fever infection if attention is paid to mosquito generation, in preventing their breeding, when individuals happen in a country or community where these two diseases may be prevailing.

C. M. Jones. He appeared to pay but little attention to the testimony or arguments and devoted his time to reading throughout the trial. In fact, it appeared that he was indifferent and did not care what the outcome might be, and even when the jury rendered its verdict he did not appear surprised.

There were seven counts against Mr. Burton, they being for uttering forged paper, forgery, obtaining the signature of the chairman of the Board of County Commissioners by false pretenses, falsifying public records, and charges of this nature.

The case was fought by the attorneys for the defense and prosecution from start to finish, and when the verdict of the jury was rendered Attorney Jones, representing the defendant, made a motion for a new trial of the case and this will be argued later.

Mr. Burton was not placed, in fact, but allowed to return home under the same bond as he had been under previous to the trial and with the same bondsmen. He will have to make a new bond, however this morning.

There were many interested spectators in court during yesterday, especially late in the afternoon, when it became known that the case would be concluded and go to the jury before the adjournment of court. The charge of Judge Beggs to the jury was listened to attentively by those in the courtroom, and the jury retired at 6 o'clock. At 7:30 an adjournment was taken until 9:30, and a few moments afterwards the verdict was rendered.

TERSELY TOLD BUSINESS LOCALS.

Hendrix & Carpenter will furnish estimates on building and painting and give personal attention to work. 932 E. Strong, and 824 East LaRue streets.

McKinzie Oerting & Co., wholesale and retail ship chandlers and grocers, the only first-class house of the kind in Pensacola. Fair prices to all.

Why use inferior paper, when you can buy Kelso Bond, French Dimity, Kara Linen, or Crane's Bond at C. V. Thompson's, 30 S. Palafox.
